

PRIVACY INTELLIGENCE REPORT

Brex, Inc.

Executive Benchmark & Regulatory Risk Analysis

PREPARED FOR
Brex, Inc.

REPORT DATE
2026-08-05

ASSESSMENT TYPE
Privacy Intelligence Assessment

CONFIDENTIAL · This report contains proprietary Visentix intelligence and is intended solely for the use of the named recipient.

02 EXECUTIVE SUMMARY Executive Summary

OVERALL SCORE

70.9/100

Developing band

BENCHMARK PERCENTILE

88.1th

within peer cohort

REGULATORY EXPOSURE

High

exposure score 62.4

Brex presents an overall privacy intelligence score of 70.9 out of 100 (Developing), placing it at the 88.1th percentile within its peer cohort (n=93 peers). The assessment identified 4 areas of elevated exposure. Confidence level: Moderate.

Key Intelligence Takeaways

- ◆ The data sharing domain presents elevated exposure (finding SH-002, score 65.0/100).
- ◆ AI transparency is the weakest dimension at 15.7/100 — disclosures omit automated-decision logic.
- ◆ Disclosure maturity is strong at 98.5/100, placing the notice in the top quartile on completeness.

Benchmarked against n=93 peers as of 2026-08-05.

REGULATORY LANDSCAPE
 05Regulator Exposure

Overall regulatory exposure: **62.4** (High).

California Privacy Protection Agency
 California
 Peak exposure **18.7**

European Data Protection Board
 EU
 Peak exposure **10.7**

Federal Trade Commission
 US Federal
 Peak exposure **24.0**

New York State AG
 New York
 Peak exposure **10.0**

Top Regulator Risk Drivers

- Federal Trade Commission** · Data Sharing — exposure 24.0
- California Privacy Protection Agency** · Data Sharing — exposure 18.7
- California Privacy Protection Agency** · Consumer Rights — exposure 14.0
- European Data Protection Board** · Consumer Rights — exposure 10.7
- New York State AG** · Data Sharing — exposure 10.0

DISCLOSURE FINDINGS
 06Disclosure Findings

Total findings: 4.

AI-004 · AI & Automated Decisions HIGH Confidence: Moderate	70.0 exposure
RT-003 · Retention MEDIUM Confidence: Moderate	45.0 exposure
SH-002 · Data Sharing HIGH Confidence: Moderate	65.0 exposure
TC-001 · Tracking & Cookies LOW Confidence: Moderate	22.0 exposure

Notice-section clause references are not carried in this snapshot and are intentionally omitted rather than estimated.

07 COMPOUND EXPOSURE Compound Risk Analysis

Compound Risk Level: High - 58.3/100

Compound risk reflects how individual exposures reinforce one another. A higher score means findings cluster into a larger combined regulatory surface.

Top Compound Risk Drivers

- 1 AI-004 — 70.0
- 2 SH-002 — 65.0

Compound Risk Impact

At a high compound level, remediating the highest-severity findings first yields the largest reduction in combined exposure.

08 LANGUAGE BENCHMARKING Benchmark Language Comparison

Data Sharing

YOUR NOTICE LANGUAGE

We share personal information with service providers and advertising partners to operate and improve our services.

TOP-QUARTILE BENCHMARK EXAMPLE

No SME-approved exemplar for this domain yet.

Retention

YOUR NOTICE LANGUAGE

We retain personal information for as long as necessary to provide the services.

TOP-QUARTILE BENCHMARK EXAMPLE

No SME-approved exemplar for this domain yet.

09 ACTION PLAN Strategic Recommendations

- **Disclose automated decision logic** HIGH
Given your use, add a plain-language explanation of automated decisions and the right to human review.
- **Tighten data-sharing disclosures** HIGH
Name the categories of recipients and the purpose of each sharing arrangement.
- **Specify retention periods** MEDIUM
State concrete retention durations per data category rather than 'as long as necessary'.

PRIORITISATION
 10 Risk Reduction Priorities

2 high-severity and 1 moderate-severity findings drive the prioritisation below.

High	Moderate	Low
1 Strengthen ai automated decisions disclosure (AI-004) 2 Strengthen data sharing disclosure (SH-002)	1 Strengthen retention disclosure (RT-003)	No actions at this level.

 Per-finding notice-section page references are not carried in this snapshot and are omitted rather than estimated.

12^{FORWARD VIEW} Trend & Emerging Risk

Trend begins after your next monitored capture

Per-company trend requires monitoring history. Your first capture establishes the baseline; the trend line appears once a second monitored capture exists. Visentix does not draw a trend from a single point.

Regulatory Landscape

4 regulators are actively weighted in the current enforcement model. Per-company trend analysis requires monitoring history (Phase 2 monitoring). This panel shows the static regulatory landscape.

Thank you for your trust.
